

Imported Cement

NZRMCA Technical Note 7

General

Imported cements can be used provided they can be shown to have equivalency to the requirements of NZS 3122, NZS 3123 or NZS 3125.

This is a requirement of NZS 3104.

For audit purposes to NZS 3104 it will be necessary to demonstrate documented compliance with the New Zealand cement Standards.

Accordingly where imported cement is being used, cement certificates to NZS 3122, NZS 3123 or NZS 3125 will be required to be presented at the time of annual report submission.

PLANT AUDIT COMMITTEE

**Prepared by the NZRMCA Technical Committee
October 2009**
